IMAGE WEB SERVER

Imagine sending detailed mapping images with enough data to fill 5 million typewritten pages anywhere in the world in just seconds. Now you can with Image Web Server. Thanks to this technological breakthrough, Image Web Server allows you to send and receive photographic map images of any size and resolution across the Web with standard desktop computer equipment. You can view and edit the files in any GIS, CAD or Microsoft® Office program in less time than it takes to fold a map.

ECW - THE NEW STANDARD FOR IMAGE DELIVERY

What is the secret behind this revolutionary new image delivery system? It's a powerful new technology called ECW (Enhanced Compressed Wavelet) that lets you compress terabytes of information (that's 1000s of gigabytes) and send it over the Internet or your secure intranet in a few seconds...all with low cost, desktop computer systems.

R E C O M M E N D E D H A R D W A R E C O N F I G U R A T I O N S

| Edition    | Operating System   | RAM   | Disk Storage | Server  |
|------------|--------------------|-------|--------------|---------|
| Enterprise | Windows® NT Server | 1GB   | 50GB         | IIS     |
| Corporate  | Windows® NT Server | 512MB | 10GB         | IIS     |
| Office     | Windows® NT/98/95  | 128MB | 1GB          | PWS/IIS |
| ER Mapper  | Windows® NT/98/95  | 64MB  | 50MB         | PWS/IIS |
| Free       | Windows® NT/98/95  | 32MB  |              | PWS/IIS |

SERVE IMAGES TO YOUR APPLICATIONS WITH PLUG-INS

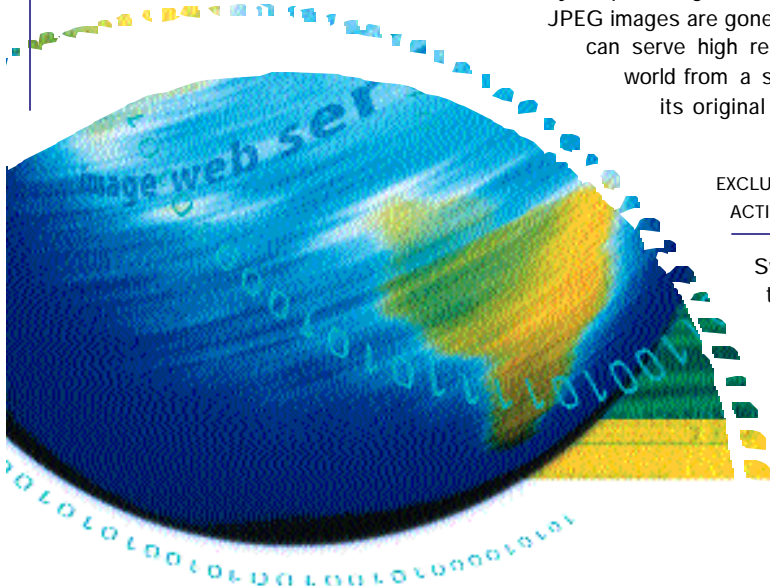

With Image Web Server's plug-ins, you can view images in any GIS, CAD and Microsoft® Office software package with just a few clicks of a mouse. It's easy and it's free! Just download the appropriate plug-in and away you go!

HIGH RESOLUTION AT VERY HIGH SPEEDS

The days of producing thousands of low resolution thumbnail JPEG images are gone. With Image Web Server, you can serve high resolution data anywhere in the world from a standard PC server and retain its original resolution at the other end.

EXCLUSIVE BREAKTHROUGH FEATURE - ACTIVE ZOOM

Sweep over terabytes of imagery in real time while zooming from outer space down to inches on the ground with Active Zoom, a powerful new technology available only through Image Web Server. No more waiting for images to reload only to find that you aren't seeing what you want to see.
